CONTENTS OF VOLUME 31

NUMBER 1—JANUARY 2000

Editorial ... 1

Experimental study for trajectory tracking of a two-link flexible manipulator
Y. Li, B. Tang, Z. Shi and Y. Lu ... 3

Direct parameter identification of distributed parameter systems
D. Coca and S. A. Billings ... 11

A class of nonlinear observers for discrete-time systems with parametric uncertainty
Z. Wang and H. Unbehauen ... 19

An application and comparison of some flexible parametric and semiparametric qualitative-response models with heteroskedasticity
J. B. McDonald and J. V. Hansen ... 27

An adaptive variable structure output tracking controller with improved transient performance
T. H. Lee, J. X. Xu and M. Wang ... 35

Globally optimal bounding ellipsoid algorithm for parameter estimation using artificial neural networks
X.-F. Sun, Y.-Z. Fan and F.-Z. Zhang ... 47

An algebraic approach to the robust stability analysis and robust stabilization of uncertain singular systems
S. Xu and C. Yang ... 55

Mixed time- and frequency-domain robust eigenstructure assignment
G. P. Liu, G. R. Duan and R. J. Patton ... 63

Actuators and regional boundary controllability of parabolic systems
E. Zerrik, A. Boutoulout and A. El Jai ... 73

A combined genetic algorithms–shooting method approach to solving optimal control problems
Y. C. Sim, S. B. Leng and V. Subramaniam ... 83

Optimal schedule and effort considering the penalty cost of schedule delay in software development
H.-W. Jung, Y.-W. Ahn and G.-J. Kim ... 91

Multivariable disturbance modelling for web processes
K. W. Corscadden and S. R. Duncan ... 97

A linear programming algorithm for optimal portfolio selection with transaction costs
Z.-F. Li, S.-Y. Wang and X.-T. Deng ... 107

Adaptive neural model-based decentralized predictive control
D. H. Wang and C. B. Soh ... 119

A single-period perishable inventory model where deterioration begins at a random point in time
M. A. Rahim, S. N. Kabadi and P. K. Barnerjee ... 131

NUMBER 2—FEBRUARY 2000

Synthesis of minimax optimal controllers for uncertain time-delay systems with structured uncertainty
S. O. Reza Moheimani, A. V. Savkin and I. R. Petersen ... 137

Detection and sources reconstruction in a tube
L. Afifi, A. El Jai and M. Merry ... 149

Chaotic analysis of US money and velocity measures
A. Serletis and I. Andreadis ... 161

An improved method for determining the stability of interval matrices
R. Ghosh, S. Sen and K. B. Datta ... 171

Time response bounds for linear parametric uncertain systems
R. K. Yedavalli and C. R. Ashokkumar ... 177

Wiener model based nonlinear predictive control
S. Gerkšič, D. Juričić, S. Strmčnik and D. Matko ... 189

Some new stability conditions for two-dimensional difference systems
H. Trinh and T. Fernando ... 203

Recursive estimation of linear systems' parameters based on cumulant matching
H. E. Emara-Shabaik ... 213

Minimization of the life cycle cost for a multistate system under periodic maintenance
C.-T. Su and C.-C. Chang ... 217
***H* Control of nonlinear discrete-time systems based on dynamical fuzzy models**
S. G. Cao, N. W. Rees, G. Feng and W. Liu ... 229
Non-local stabilization of nonlinear systems using switching manifolds
S. P. Banks, M. U. Salamci and D. McCaffrey ... 243
Operational flexibility and optimal total production cost in multiple-item economic production quantity models
B.-W. Kreng and S.-Y. Wu ... 255
A hybrid method for hydroelectric generation scheduling using an artificial neural network
R. Naresh and J. Sharma ... 263

NUMBER 3—MARCH 2000

On the identification of non-stationary linear processes
M. C. Bouzeghoub, S. W. Ellacott, A. Easdown and M. Brown ... 273
Discretization of cascaded continuous-time controllers for state and input delayed systems
W.-M. Wang, S.-M. Guo and L.-S. Shieh ... 287
A computation-efficient on-line training algorithm for neurofuzzy networks
C. W. Chan, K. C. Cheung and W. K. Yeung ... 297
A genetic approach to the identification of linear dynamical systems with static nonlinearities
H. N. Al-Duwaish ... 307
Time-varying feedforward and output feedback controllers for nonlinear time-delay processes
W. Wu ... 315
Optimal tracker for unreliable manufacturing systems
E. K. Boukas and F. Al-Sunni ... 331
A combination of fuzzy logic and neural network controller for multiple-input multiple-output systems
S.-J. Huang and R.-J. Lian ... 343
Computation of robust stability bounds for time-delay systems with nonlinear time-varying perturbations
Y.-Y. Cao and J. Lam ... 359
Robust control of linear uncertain systems with regional pole and variance constraints
L. Yu ... 367
Structural properties of a flexible-joint robot model with output controllers and some related applications
A. Ailon, E.-S. Choi and B.-H. Ahn ... 373
Sufficient conditions for Hurwitz polynomials and their application to the stability of a polytope of polynomials
T. Mori and H. Kokame ... 385
An EOQ model for deteriorating items with time-varying demand and shortages
C. Lin, B. Tan and W.-C. Lee ... 391
Synthesis of the sliding-mode neural network controller for unknown nonlinear discrete-time systems
Y. Fang and T. W. S. Chow ... 401

NUMBER 4—APRIL 2000

Robust H_∞ state feedback control of discrete time-delay linear systems with norm-bounded uncertainty
P. Shi, R. K. Agarwal, El-K. Boukas and S.-P. Shue ... 409
A new method for constructing sliding surfaces of linear time-invariant systems
Y.-P. Chen and J.-L. Chang ... 417
The effect of noise on adaptive envelope-constrained filters
#W. X. Zheng ... 421
Optimal finite-precision controller realization of sampled-data systems
R. H. Istepanian, S. Chen, J. Wu and J. F. Whidborne ... 429
Design of output feedback controllers for sampled-data fuzzy systems
M. Nishikawa, H. Katayama, J. Yoneyama and A. Ichikawa ... 439

A genetic algorithm for solving a maintenance model in a FMS
C. LIN, J.-M. YEH and J.-R. DING ... 449
Hybrid fuzzy convolution modelling and identification of chemical process systems
J. ABONYI, L. NAGY and F. SZEIFERT ... 457
Discrete modelling of uncertain continuous systems having an interval structure using higher-order integrators
C.-C. HSU and W.-Y. WANG ... 467
The equivalent discrete-time optimal control problem for time-varying continuous-time systems with white stochastic parameters
L. G. VAN WILLIGENBURG and W. L. DE KONING ... 479
Decentralized stabilization of large-scale linear continuous systems with time-varying delays
B. XU ... 489
Comparison of three modern multicriteria decision-making tools
C. PARKAN and M.-L. WU ... 497
Multi machine power system excitation control design via theories of feedback linearization control and nonlinear robust control
D. GAN, Z. QU and H. CAI ... 519
Constrained regulation of linear discrete-time systems with time delay: delay-dependent and delay-independent conditions
A. HMAMED ... 529
A revised simulated annealing algorithm for obtaining the minimum total tardiness in job shop scheduling problems
T.-Y. WANG and K.-B. WU ... 537

NUMBER 5—MAY 2000

Quantitative design and analysis of fuzzy proportional–integral–derivative control—a step towards autotuning
H.-X. LI and S. K. TSO ... 545
Nonlinear observers for a class of continuous-time uncertain state delayed systems
Z. WANG and H. UNBEHAUEN ... 555
The use of simulation in discrete-event dynamic systems design
H. ARSHAM ... 563
Application of fuzzy probability in water quality management of a river system
K. SASIKUMAR and P. P. MUJUMDAR ... 575
Optimal age and block replacement policies for a multi-component system with failure interaction
J.-P. JHANG and S.-H. SHEU ... 593
Implementing an optimal policy for set-up time reduction in an economic production quantity model
B.-W. KRENG and S.-Y. WU ... 605
Qualitative analysis of equilibrium systems
Y. K. WONG ... 613
A method of transferring cones of intersection form to cones of sum form and its applications in data envelopment analysis models
H. YAN and Q. WEI ... 629
Trade-off solutions in a single-machine scheduling problem for minimizing total earliness and maximum tardiness
C.-C. WU, W.-C. LEE and J.-M. YOU ... 639
Supervisory control of partially observed discrete event systems with arbitrary control patterns
S. TAKAI ... 649
Incorporating prior knowledge in fuzzy model identification
J. ABONYI, R. BABUŠKA, H. B. VERBRUGGEN and F. SZEIFERT ... 657
Comparison of performance and computational efficiency in multirate linear quadratic Gaussian control
J.-W. LEE and J.-H. OH ... 669

NUMBER 6—JUNE 2000

An EOQ inventory model with time-varying demand and Weibull deterioration with shortages
J.-W. Wu, C. Lin, B. Tan and W.-C. Lee ... 677

A method for simultaneous strong stabilization of linear time-varying systems
A. V. Savkin and I. R. Petersen ... 685

Robust design of pole placement controllers in the presence of structured uncertainty
W. X. Zheng ... 691

A multiple-criteria decision problem for optimal management of farm resources under uncertainty—a case study
A. Bhattacharya ... 699

Design of observers with unknown inputs using eigenstructure assignment
S.-F. Lin and A.-P. Wang ... 705

A rule-based pilot performance model
M. S. McCoy and R. R. Levary ... 713

A modified algorithm for aiming point guidance law
C.-M. Chen, C.-L. Chou, L.-P. Tsao and C.-T. Chen ... 731

Design of linear functional observers for linear systems with unknown inputs
H. Trinh and Q. Ha ... 741

Optimal bidirectional associative memories
G. Shi ... 751

Design of decentralized constant-volume controllers for open-channels by solving a least squares problem
C. Seatzu ... 759

Hybrid multilayered perceptron networks
M. Y. Mashor ... 771

Time-domain approaches to multichannel optimal deconvolution
Z.-L. Deng ... 787

Optimal redundancy management in reconfigurable control systems based on normalized nonspecificity
N. E. Wu and G. J. Klir ... 797

Comments on 'Bounds for the eigenvalues of the solution matrix of the algebraic Riccati equation' by E. Yaz
A. Czornik ... 809

NUMBER 7—JULY 2000

Editorial for the Special Issue on 'Emergent Properties of Complex Systems': Emergence and levels of abstraction
R. I. Damper ... 811

Time-invariant long-range correlations in electroencephalogram dynamics
P. A. Watters ... 819

Collective behaviour in cellular neural networks to model the central pattern generator
P. Arena and L. Fortuna ... 827

Towards the evolutionary emergence of increasingly complex advantageous behaviours
A. D. Channon and R. I. Damper ... 843

On the emergence of intelligent global behaviours from simple local actions
D. P. Benjamin ... 861

Emergent phenomena in large sparse random arrays of Conway's 'Game of Life'
N. M. Gotts ... 873

Control: an emergent property of biological neurons
J. R. Alexander, Jr and S. Challef ... 895

The temporal correlation hypothesis for self-organizing feature maps
Y. Chen and J. A. Reggia ... 911

NUMBER 8—AUGUST 2000

Nonlinear identification and control of aircraft
S. E. LYSHEVSKI ... 923
Buffer sizing in complex cellular manufacturing systems
S.-D. LEE ... 937
Sigma adaptive fuzzy sliding mode control of a class of nonlinear systems
J.-P. SU and C.-T. HUANG ... 949
Stability of neutral delay-differential systems with nonlinear perturbations
J. H. PARK and S. WON ... 961
Modelling the dynamics of supply chains
C. E. RIDDALLS, S. BENNETT and N. S. TIPI ... 969
Evaluation of the information flow in a hierarchical shop floor control framework
C. OU-YANG and J. C. LEE ... 977
Repeated least squares with inversion and its application in identifying linear distributed-parameter systems
E. RAFAJŁOWICZ ... 1003
Decentralized dynamic output feedback controllers for interconnected systems with mismatched uncertainties using new sliding mode control
K.-K. SHYU, Y.-W. TSAI, Y. YU and C.-K. LAI ... 1011
Design of multirate observers and multirate control systems
H. KANDO, H. UKAI and Y. MORITA ... 1021
Robust stability of impulsive periodic hybrid systems with dependent perturbations
C. B. SOH ... 1031
Optimal design of robust quantitative feedback controllers using random optimization techniques
A. KHAKI-SEDIGH and C. LUCAS ... 1043
Diagonalization algorithms for linear time-varying dynamic systems
P. VAN DER KLOET and F. L. NEERHOFF ... 1053

NUMBER 9—SEPTEMBER 2000

Data envelopment analysis in resource allocation: an application to forest management
C. KAO ... 1059
Robust wedge-stability analysis and design of continuous constrained systems with stability radii
Y.-H. CHANG and J.-C. CHANG ... 1067
Design of linear observers for a class of linear hybrid systems
M. DE LA SEN and N. LUO ... 1077
Mixed $\mathcal{L}_2\mathcal{L}_\infty/\mathcal{H}_\infty$ filtering for uncertain linear systems: a linear matrix inequality approach
R. M. PALHARES and P. L. D. PERES ... 1091
Gain adaptation in sliding mode control of robotic manipulators
M. ERTUGRUL, O. KAYNAK and F. KERESTECIOGLU ... 1099
Supervisory control for optimal route guidance in intelligent vehicle highway systems based on hybrid network models
K.-H. CHO, M.-S. LEE and J.-T. LIM ... 1107
Comparisons of nonhomogeneous Poisson process software reliability models and its applications
X. ZHANG and H. PHAM ... 1115
A novel image compression using grey models on a dynamic window
Y.-T. HSU and J. YEH ... 1125
Actuator fault-tolerant control design: demonstration on a three-tank-system
H. NOURA, D. THEILLIOL and D. SAUTER ... 1143
A novel algorithmic approach to the integration of posterior knowledge into condition-monitoring systems
S. MARRIOTT and R. F. HARRISON ... 1157
Variance-constrained multiobjective filtering for uncertain continuous-time stochastic systems
Z. WANG and H. SHU ... 1175

Delay and size in hierarchical organizations
C. C. HSIEH and T. C. WOO ... 1185

NUMBER 10—OCTOBER 2000

Adaptive output-feedback control of induction motors
M. FEEMSTER, P. VEDAGARBHA, D. HASTE and D. M. DAWSON ... 1195
A periodic review inventory model involving variable lead time with a service level constraint
L.-Y. OUYANG and B.-R. CHUANG ... 1209
Robust spacecraft attitude control using adaptive fuzzy logic
C. KWAN, H. XU and F. LEWIS ... 1217
Use of neural networks in iterative learning control systems
J. Y. CHOI and H. J. PARK ... 1227
Adaptive linear finite-element method for modelling nonlinear dynamic systems
C. J. HARRIS and J. B. GAO ... 1241
Integration of multi-time-scale models in time series forecasting
F. T. MURRAY, J. V. RINGWOOD and P. C. AUSTIN ... 1249
A frequency-domain approach to bifurcations in control systems with saturation
J. ARACIL, E. PONCE and T. ÁLAMO ... 1261
Order and delay selection for neural network modelling by identification of linearized models
J. B. GOMM and D. L. YU ... 1273
Decentralized global disturbance attenuation for a class of large-scale uncertain nonlinear systems
S. XIE and L. XIE ... 1285
Recursive algorithm for mixed H_2/H_∞ control problem of singularly perturbed systems
H. MUKAIDANI, H. XU and K. MIZUKAMI ... 1299
Global asymptotic stability of neural networks with transmission delays
J.-D. CAO ... 1313
Linearization of a dynamic programming equation
M. LEFEBVRE ... 1317
Prediction of chatter in high-speed milling by means of fuzzy neural networks
C. SU, J. HINO and T. YOSHIMURA ... 1323

NUMBER 11—NOVEMBER 2000

Editorial ... 1331
Next generation structural health monitoring and its integration into aircraft design
C. BOLLER ... 1333
New trends in non-destructive evaluation in relation to the smart materials concept
P. F. GOBIN, Y. JAYET, J. C. BABOUX, M. SALVIA, A. CHATEAUMINOIS, J. C. ABRY and G. GIRAUD 1351
A global non-destructive damage assessment methodology for civil engineering structures
N. STUBBS, S. PARK, C. SIKORSKY and S. CHOI ... 1361
Experimental verification of intelligent fault detection in rotor blades
J. CATTARIUS and D. J. INMAN ... 1375
Advanced data pre-processing for damage identification based on pattern recognition
W. J. STASZEWSKI ... 1381
Detection of defects in composite plates using Lamb waves and novelty detection
K. WORDEN, S. G. PIERCE, G. MANSON, W. R. PHILP, W. J. STASZEWSKI and B. CULSHAW ... 1397
Fault detection in rotating machinery using kernel-based probability density estimation
M. J. DESFORGES, P. J. JACOB and A. D. BALL ... 1411
Novelty detection for the identification of abnormalities
L. TARASSENKO, A. NAIRAC, N. TOWNSEND, I. BUXTON and P. COWLEY ... 1427
A study on neuro-fuzzy systems for fault diagnosis
R. J. PATTON, J. CHEN and H. BENKHEDDA ... 1441
PLS modelling and fault detection on the Tennessee Eastman benchmark
D. J. H. WILSON and G. W. IRWIN ... 1449

Fault detection in continuous processes using multivariate statistical methods
P. R. GOULDING, B. LENNOX, D. J. SANDOZ, K. J. SMITH and O. MARJANOVIC ... 1459
Non-linear principal components analysis with application to process fault detection
F. JIA, E. B. MARTIN and A. J. MORRIS ... 1473
Fault identification: an approach based on propagation digraphs
R. SCATTOLONI ... 1489
Model-based diagnosis of systems emphasizing a holistic approach
H. G. NATKE and C. CEMPEL ... 1497
The design and implementation of intelligent systems for structural integrity assessment
J. A. BRANDON ... 1505
Robustness of model-based fault diagnosis: decisions with information-gap models of uncertainty
Y. BEN-HAIM ... 1511

NUMBER 12—DECEMBER 2000

Robustness property of high-gain observers for closed-loop nonlinear systems: theoretical study and robotics control application
R. MARTINEZ-GUERRA, A. POZNYAK and V. DIAZ DE LEON ... 1519
Nonlinear system identification using wavelet networks
G. P. LIU, S. A. BILLINGS and V. KADIRKAMANATHAN ... 1531
Optimization of parameter design: an intelligent approach using neural network and simulated annealing
C.-T. SU and H.-H. CHANG ... 1543
The non-integer difference of the discrete-time function and its application to the control system synthesis
P. OSTALCZYK ... 1551
Controllability and observability of periodic hybrid interval systems
C. B. SOH ... 1563
Fault-tolerant supervisory control under C, D observability and its application
K.-H. CHO and J.-T. LIM ... 1573
An optimization approach to design of cellular neural networks
J. PARK and Y. PARK ... 1585
Fixed-structure controller synthesis for systems with input nonlinearities and time delay
V. KAPILA, W. M. HADDAD and A. GRIVAS ... 1593
Robust discrete adaptive input–output-based sliding mode controller
D. SHA and V. B. BAJIĆ ... 1601
The stability of the linear systems with delays
H. TING-ZHU, Z. SHOU-MING and W. CHUAN-LONG ... 1615
The frequency-domain analysis of discrete variable structure control and chattering-free criteria
S. CHING-YEI CHUNG ... 1619
Modelling single-product production systems using state equations: continuous systems and discrete systems that can be represented by continuous models
M. FERNEY ... 1627
Author Index ... 1639
